Mazovia - it is the largest province in Poland. There is the capital of Poland - Warsaw. Today it covers c. 36,000 km and has more than 5 million inhabitants.

Mazovia is above all the region of green fields and natural landscapes, often regarded as the quintessence of Polish nature. The region has maintained a lot of its original character. To the bridge interesting environmental parts of the area belong unregulated fisheries rivers, inhabited by dozens of bird species, especially Storks which are characteristic for the local scenery.

WE HAVE A GREAT PATRON OF SCHOOL

The Holy Father John Paul II is a great authority for all Polish people. We still remember the day of 16 th October 1978 which brought white smoke above the Sistine Chapel in Rome and the news that a Polish metropolitan archbishop Karol Józef Wojtyła became the Pope.
